

Wyuna Poll Herefords

Est. 1955

STUD HISTORY

Wyuna stud was founded in 1955 with females from Cudgeena Stud at Howlong. Hereford females were added from South Boorook, Ohio, The Camp, Indigo and Tarcombe studs. The cattle are run under commercial conditions and bulls are selected for temperament, muscling, structure, and EBV's. An AI program to introduce new blood lines has been started in recent years; we are a Breedplan member and sell 2yo bulls to commercial breeders, along with a selection of PTIC heifers each year, coinciding with the Beef Week Field Days. The rest get fattened and sold on the domestic market.

SIREs

Sires represented in the herd include Margfred Park Blitzum, Wiranya Batavia, Sevenbardot Hummel, Koanui Blueprint, MSU Optimum, Feltons 517 and Feltons 532 (imp USA), Square-D Edge, Broughton Bosca Banner as well as home bred bulls.

Sires currently in use include Wyuna Prospect, Margfred Park V154, V542 and Blitzum

Inquiries always welcome
